

Dynamics of Mechanical Systems
July 01st, 2019
Standard problem (grading up to 30/30)

$m_1 = 10 \text{ kg}$	$\theta_0 = \pi/12$
$m_2 = 5 \text{ kg}$	$y_{01} = 2\text{e-}3 \text{ m}$
$J_1 = 0.3 \text{ kgm}^2$	$y_{02} = 1.5\text{e-}3 \text{ m}$
$J_2 = 0.1 \text{ kgm}^2$	$y_{03} = 1\text{e-}3 \text{ m}$
$L = 0.2 \text{ m}$	$\varphi_1 = \pi/6$
$a = 0.25 \text{ m}$	$\varphi_2 = 0$
$R = 0.25 \text{ m}$	$\varphi_3 = -\pi/6$
$\Delta L_{01} = 5\text{e-}3 \text{ m}$	$\Omega_1 = 4\pi$
$\Delta L_{02} = -6.4\text{e-}3 \text{ m}$	$\Omega_2 = 8\pi$
$\Delta L_{03} = 7.1\text{e-}3 \text{ m}$	$\Omega_3 = 16\pi$
$k_1 = 2.5\text{e}3 \text{ N/m}$	$C_{02} = 1 \text{ Nm}$
$k_2 = 2.5\text{e}3 \text{ N/m}$	$\varphi_T = -\pi/3$
$k_3 = 2.5\text{e}3 \text{ N/m}$	$\Omega_T = 25\pi$
$c_1 = 1 \text{ Ns/m}$	
$c_2 = 1 \text{ Ns/m}$	
$c_3 = 1 \text{ Ns/m}$	

The mechanical system above lays in the vertical plane and is shown in its equilibrium position. It's constituted by a disk that rolls without sliding on a horizontal plane, by a small slider with negligible mass which is connected to the disk's center through a hinge, and by a hollow bar AB which can slide without friction with respect to the slider.

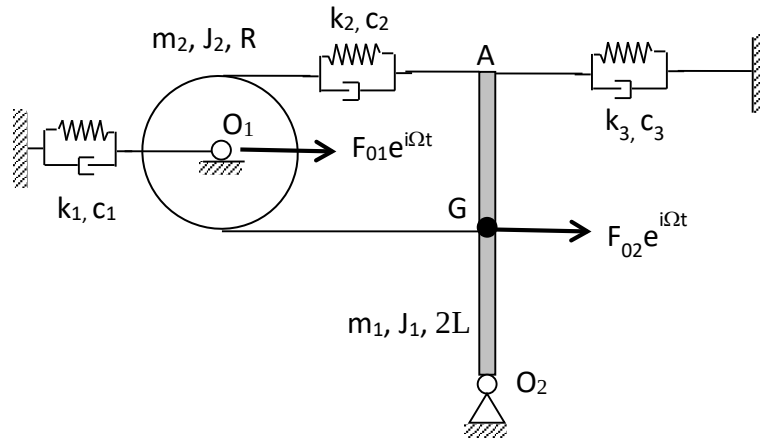

The students are requested to:

1. Write their surname, name, matriculation number and SNxxx code (see note below) on the top of first page of each sheet, leaving blank field "Nr." Sheets with uncompleted personal data will not be considered. For environmental reasons the students are kindly requested to use all of the four pages of each sheet before using another one;
2. Write the linearized equations of motion around the given equilibrium configuration;
3. Compute the natural frequencies and modes of vibrations. This answer shall be provided in written on paper;
4. Compute the Frequency Response Function (in the range 0 – 10 Hz, step = 0.01 Hz) applying the harmonic torque $C_0 e^{i\Omega t}$. Output: the horizontal component of the displacement of point G and the rotation of the disk. Save the graphical results as SNxxx1.fig and SNxxx2.fig, with S the first letter of your surname, N the first letter of your name and xxx are the last three digits of your matriculation number (e.g. for Bruni Stefano 123456: BS4561.fig and BS4562.fig)
5. Compute the Frequency Response Function (in the range 0 – 10 Hz, step = 0.01 Hz) applying the harmonic vertical constraint displacement $y_0 e^{i\Omega t}$. Output: the horizontal component of the constraint force in the contact point P and the elastic and damping force transmitted by the spring and damper system (k_2, c_2). Save the graphical results as SNxxx3.fig and SNxxx4.fig
6. Compute the time history ($T_0 = 1.0 \text{ s}$, time step = 0.001 s) applying the periodic constraint displacement $y(t) = \sum_{k=1}^3 y_{0k} e^{i(\Omega_k t + \varphi_k)}$ and the harmonic torque $C_{02} e^{i(\Omega_T t + \varphi_T)}$. Output: the constraint force in the cart B. Save the graphical result as SNxxx5.fig;

Note: Please collect the Matlab's script file relative to the numerical solution of the exercise and save it with name SNxxx.m, with S the first letter of the surname, N the first letter of the name and xxx the last three digits of the matriculation number (e.g. for Bruni Stefano 123456: BS456.m). It is mandatory that all of the files (fig e .m) are collected in one single compressed folder (in .zip or.rar format) named SNxxx.zip (or SNxxx.rar), which has to be uploaded on Beep. To upload the sipped folder:

1. Connect to the site <https://beep.metid.polimi.it> and enter the portal using your credentials;
3. Select section **Homework** of the course DYNAMICS OF MECHANICAL SYSTEMS (BRUNI STEFANO);
4. Select the folder *Test standard July 01st 2019*
5. Click on button Add and select Single document;
6. Browse the compressed file SNxxx.zip using the button Browse... (or Sfogliala...)
7. Fill the "Title" field with your code SNxxx (e.g. for Bruni Stefano 123456: BS456);
8. Confirm the procedure clicking the button Publish.

Dynamics of Mechanical Systems

Simplified problem (grading up to 22/30)

The mechanical system in the picture lays in the vertical plane and is shown in its equilibrium position. The students are requested to:

1. Write their surname, name, identification number and SNxxx code (see note below) on the top of first page of each sheet and leave blank the field named *Nr.* The sheet with uncompleted personal data may be not corrected. For environmental reasons the students are also kindly requested to write all of the four pages of each sheet before using another one.
2. Write the linearized equations of motion around the given static configuration;
3. Compute the natural frequencies and modes of vibrations;
4. Compute the Frequency Response Function (in the range 0 – 7.5 Hz, step = 0.01 Hz) applying the harmonic force $F_{01}e^{i\Omega t}$ at the disk center O_1 . Output: the displacement of point O_1 and the rotation of the bar. Save the graphical results as SNxxx1.fig and SNxxx2.fig, with S the first letter of your surname, N the first letter of your name and xxx are the last three digits of your matriculation number (e.g. for Bruni Stefano 123456: BS4561.fig and BS4562.fig)
5. Compute the Frequency Response Function (in the range 0 – 7.5 Hz, step = 0.01 Hz) applying the harmonic force $F_{02}e^{i\Omega t}$ at the point G. Output: the rotation of the disk and the horizontal component of the constraint force in the hinge O_2 . Save the graphical results as SNxxx3.fig and SNxxx4.fig;

$m_1 = 15 \text{ kg}$	$k_1 = 1000 \text{ N/m}$	$c_1 = 3 \text{ Ns/m}$
$m_2 = 10 \text{ kg}$	$k_2 = 2000 \text{ N/m}$	$c_2 = 2 \text{ Ns/m}$
$J_1 = 2.5 \text{ kgm}^2$	$k_3 = 1000 \text{ N/m}$	$c_3 = 3 \text{ Ns/m}$
$J_2 = 1.0 \text{ kgm}^2$	$R = L/2$	$L = 0.75 \text{ m}$

Note: Please collect the Matlab's script file relative to the numerical solution of the exercise and save it with name SNxxx.m, with S the first letter of the surname, N the first letter of the name and xxx the last three digits of the matriculation number (e.g. for Bruni Stefano 123456: BS456.m). It is mandatory that all of the files (fig e .m) are collected in one single compressed folder (in .zip or.rar format) named SNxxx.zip (or SNxxx.rar), which has to be uploaded on Beep. To upload the sipped folder:

1. Connect to the site <https://beep.metid.polimi.it> and enter the portal using your credentials;
3. Select section **Homework** of the course DYNAMICS OF MECHANICAL SYSTEMS (BRUNI STEFANO);
4. Select the folder *Test simplified July 01st 2019*
5. Click on button Add and select Single document;
6. Browse the compressed file SNxxx.zip using the button Browse... (or Sfogliala...)
7. Fill the "Title" field with your code SNxxx (e.g. for Bruni Stefano 123456: BS456);
8. Confirm the procedure clicking the button Publish.
